

Juggernaut

Cuts nearly everything....

Demolition
Rescue
Civil defense
Drainage
Building
Renovation
Housemovers

Juggernaut cuts steel 6mm..15mm, iron, ductile pipe, concrete, brick, aluminium, brass, copper, stainless steel, auto-bodies & frames, glass, fiberglass, pvc/pipeplastic, roof tile, floor tile, metal roofing, reinforced concrete with rebar, guard rail, steel doors, wood 100x50mm, plywood, security bars, door locks and deadbolts, tempered chain, pvc, and many other building materials.

Juggernaut cuts wet or dry and is available in sizes 230mm 300mm and 350mm diameter with bore sizes to fit most power cut off saws and grinders.

Juggernaut solves the problem of having to swap abrasive and diamond blades...one blade does all.

New vacuum brazing technology allows an extremely tough blade to be produced which is designed to cut quickly and economically, through most materials.
