“Yellow Tornado” high speed dry cutter for very hard bricks and vitrified tiles and porcelains

Bricklayers will tell you that cutting wet is the norm but every now and again a dry cutting operation is the go..

“Yellow Tornado” was developed for high productivity dry cutting of very hard brick and tiles. Especially suitable for use on portable dry brick saws.

The state of the art diamond and metal bond technology work together to provide excellent long life cutting in a wide variety of hard products on typical masonry and bricksaws of about 2 h.p.

ISO 9001 quality assures consistency coupled with attractive pricing and longlife to reduce overall cutting costs.
