“Blue Shark ” tough wet/dry general purpose blade

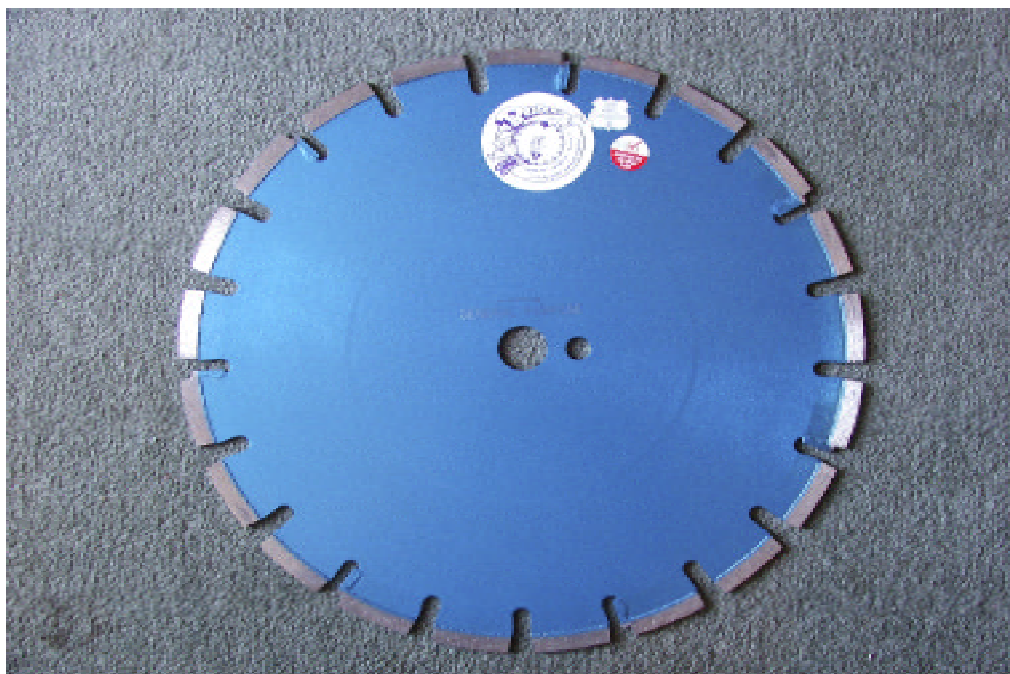

Power cut off saws are, by design, handy. They are designed to cut a little of this and a little of that.

They also work under difficult conditions such as frequent penetration into the base course! Recognising this we have built in tough core protection in the form of large diamond segment gullet inserts.

Contractors have many varied needs for hand held power cut off saws. Cuts are made on roads, footpaths, driveways, curbs, manholes, pipes, you name it. They insist on the safety of ISO 9001 quality.

“Blue Shark”, a member of our very successful “Shark” family, has been designed to perform best on typical Infrastructure jobs with power cut off saws like Stihl, partner, Husqvarna etc. 65..110 ccs.

“Blue Shark” is laser welded at white heat to ensure the segments stay put when the going gets rough. We use state of the art heat conducting technology and expensive raw materials to produce a blade you can trust when cutting typical roads, footpaths driveways and kerbs and concrete pipes.

“ Working safer working Smarter”
