“Black Mastiff ” super tough wet/dry general purpose

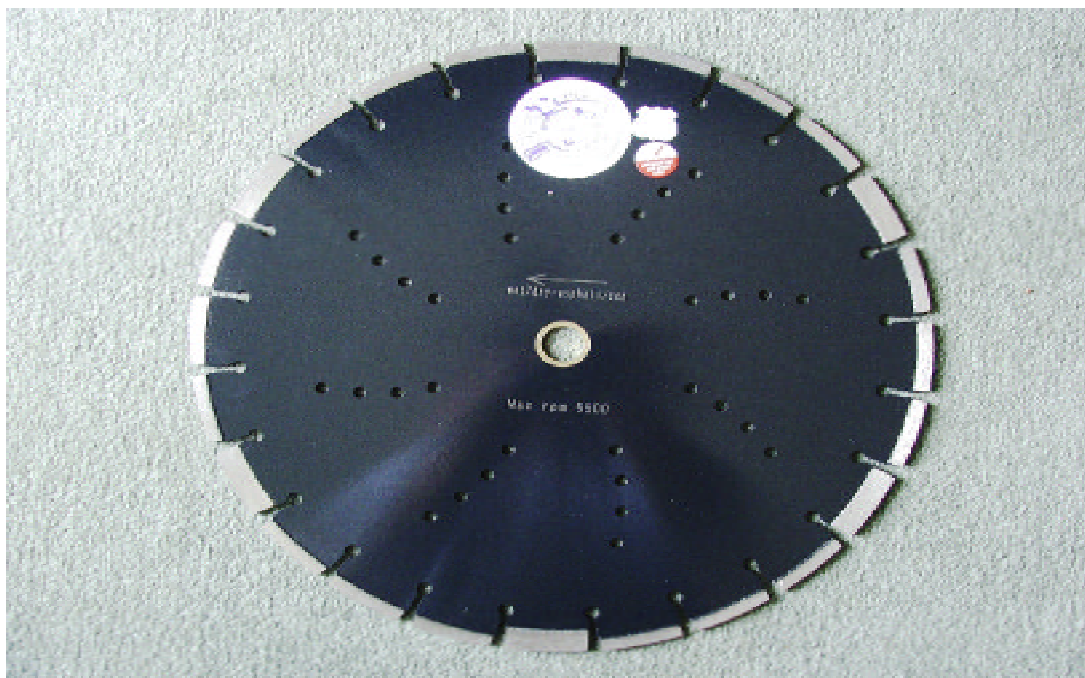

“Black Mastiff”, as the name implies, is a seriously tough general purpose blade for the contractor who has tough conditions to deal with.

Built to rigid ISO 9001 standards, “Black Mastiff” is tougher than ever due to a special heat absorbing design, anti warp cooling holes, wet/dry bond and deep core protective segments.

We have developed “Black Mastiff” for use on 90cc to 125cc power cut off saws.

Diamond and bond selection has been carefully chosen for a wide variety of New Zealand concretes and asphalts especially those with medium hard aggregates.

“Black mastiff ” is particularly suited to work where mostly asphalt and chipseal is cut but with the ability to cut curbs, footpaths, and driveways. ie 80% asphalt 20% concrete in relatively short cut lengths.
