“Red Shark ” tough durable wet/dry asphalt blade

Not everyone wants a top performance, maximum strength and durability blade like “Pitbull” instead they prefer a wet/dry blade that is more in keeping with their intended use.

Other users recognise that the diamond blade lives in a hostile world, where they have little control, and reason that keeping “plant at risk” costs to a reasonable level is a real consideration.

The Infrastructure industry has many varied needs for its’ myriad of hand held power cut off saws. Cuts are made on asphalt hotmix and chipseal roads, footpaths, driveways, curbs, you name it.

“Red Shark”, a member of our very successful “Shark” family, has been designed to perform best on typical Infrastructure jobs with power cut off saws like Stihl, partner, Husqvarna etc. 65..100 ccs.

“Red Shark” is laser welded at white heat to ensure the segments stay put when the going gets rough. We use state of the art heat conducting technology and expensive raw materials to produce a blade you can trust when cutting typical asphalt and hotmix roads, footpaths driveways and kerbs.
