

HYPER BLADES

DESIGN PHILOSOPHY

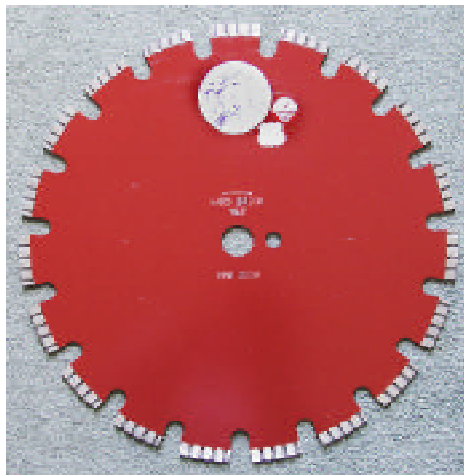

Decades of diamond saw blade use, by millions of users all over the world, has confirmed one vital fact. "There is no such thing as a really efficient general purpose blade for all materials, all machines, and all conditions"

Often requested, this elusive tool remains as rare as ever. Instead, diamond saw blade design engineers have discovered different ways of yielding maximum cutting rates and tool life, from custom developed blades for various operations. Machine horsepower and type, material composition, budget, speed of cut preferences, and many other factors are taken into account when configuring blades.

The amazing central component is man made diamond. Synthesised in modern factories, using secret production facilities, diamond is grown into crystals which can be consistent in shape, toughness and processing damage resistance. Each tooth a marvel of hardness, in it's own right capable of cleaving the hardest concrete or stone.

We aim to lower your costs through shared experience and teamwork.

"Tough Cookie" HARD BRICKS, CLAY PRODUCT, PAVERS

After 30 years of in field experience, observation, testing, and development, we are very proud to announce "Tough Cookie" the fastest wet cutting 350mm brick blade you can find for brick saws.

"Tough Cookie's" radical design has revolutionised brick cutting. Guaranteed to cut through hard bricks and other clay products without the need for continuous sharpening, this low noise technology sets the standards.

The wide hybrid slot design coupled with low noise technology and aggressive diamond teeth creates very fast cutting of hard clay materials, including hard brick, clay pavers and clay block.

A special diamond configuration, efficient cuttings ejection design, and our low friction super bond deliver up to 50 to 60% faster cutting than your usual blade and yet yields a long life. So for very high speed, low noise durable cutting and value for money "Tough Cookie" is very hard to beat.

What's more this winner is guaranteed to give faster cutting or we'll credit any other brick saw blade purchase from us with the amount you paid. Considering our extensive range of highly developed blades that is a great proposition.

From a safety stand point it is important to know that this blade is fully laser welded for operational safety. All important under New Zealand's tough health and safety laws. Yes it is manufactured to strict I.S.O.9001 quality standards unlike many other brands.

We'll say it again to be clear. This is very likely to be the fastest, quietest, safest best value brick-clay product blade you have ever purchased. Especially so with low powered Australian brick saws and harder than usual bricks.

We have saved the best until last. This superb blade is available at a price usually reserved for entry level blades from other suppliers.
