“ Eliminator ” economical wet/dry multi purpose blade

Not everyone wants a top performance, maximum strength and durability pro blade, instead they prefer a versatile wet/dry blade that is priced more in keeping with their occasional use or higher risk of loss

Many contractors recognise that the diamond blade lives in a hostile world, where they have little control, and reason that keeping “plant at risk” costs to a reasonable level is a real consideration.

The Infrastructure industry has many varied needs for its' myriad of hand held power cut off saws. Cuts are made on roads, footpaths, driveways, curbs, manholes, pipes, you name it..

“ Eliminator ”, has been designed to perform best on typical Infrastructure jobs with power cut off saws like Stihl, partner, Husqvarna etc. 65..100 ccs where a good, safe, general performance is required

“ Eliminator “ is laser welded and core protected to ensure the segments stay put when the going gets rough. We use state of the art heat conducting technology and expensive raw materials to produce a blade you can trust when cutting typical roads, footpaths driveways and kerbs. Hard aggregate areas are no problem.

“ Working safer working Smarter”
