“Dynatron” economical, flexible lower noise general masonry blade

Masonry saws come in a wide variety, so do concrete cobbles, blocks and bricks.

“The development of “Dynatron” went hand in hand with the need for a flexible no nonsense tool for a reasonable price. Both hard and medium hard aggregate concrete cobbles, pavers and blocks can be cut as well as most masonry materials including bricks. It has a low noise core to reduce annoyance of neighbours and coworkers !

Up to the minute diamond and metal bond technology works together to provide durability and good cutting rates in a wide variety of concrete products on typical masonry and bricksaws of about 1 1/2 - 3 h.p.

ISO 9001 quality assures consistency coupled with safety to reduce overall costs.
