“Dam Busta ” Pro wet hard agg. cured concrete blade

High strength hard aggregate cured concretes with reinforcements is heavy going for flatsaws up to 25 h.p.

“Dam Busta” is a deep section fast cutter for these hard unyielding concretes.

We have developed “Dam Busta” for use on slab saws up to 25 h.p. with aggressive long lasting diamond segments. It is designed for high productivity sawing.

Diamond and bond selection has been carefully chosen for difficult to cut New Zealand concretes especially those with hard aggregates. Diamonds are tough and specially shaped to pierce hard stones.

“Dam Busta” is laser welded at white heat to ensure the segments stay put when the going gets tough. Construction is to ISO 9001 quality standards which translates to; consistent, dependable, safer.

“ Working safer working Smarter”
