“Black Tornado” durable wet asphalt chipseal blade

You may be one of the contractors involved in cutting asphalt and chipseal roads and footpaths for utilities and repairs, using a relatively low horsepower concrete saw 5 h.p..18 h.p. (10..15 KW). In which case you will appreciate the performance of our pro 300 mm (14”) “Black Tornado”.

Over thirty years of diamond saw blade development work in New Zealand is behind the special capabilities of “Black Tornado”. We have honed features technologies and price to bring you a first rate, economically priced, asphalt blade for your small saw.

“Black Tornado “ has been developed in conjunction with very experienced professionals involved in day to day cutting of footpaths, roads and driveways all over New Zealand. It is effectively undercutting protected, and gives high metreages.

You can be confident that this asphalt blade will serve you well in keeping overall costs down.
