“Tiger Shark ” tough xtra durable wet/dry asphalt blade

The busy roading contractor, with trained men or working alone, wants a very durable and tough blade for asphalt and hotmix work. A blade he can put on and leave on the saw with confidence.

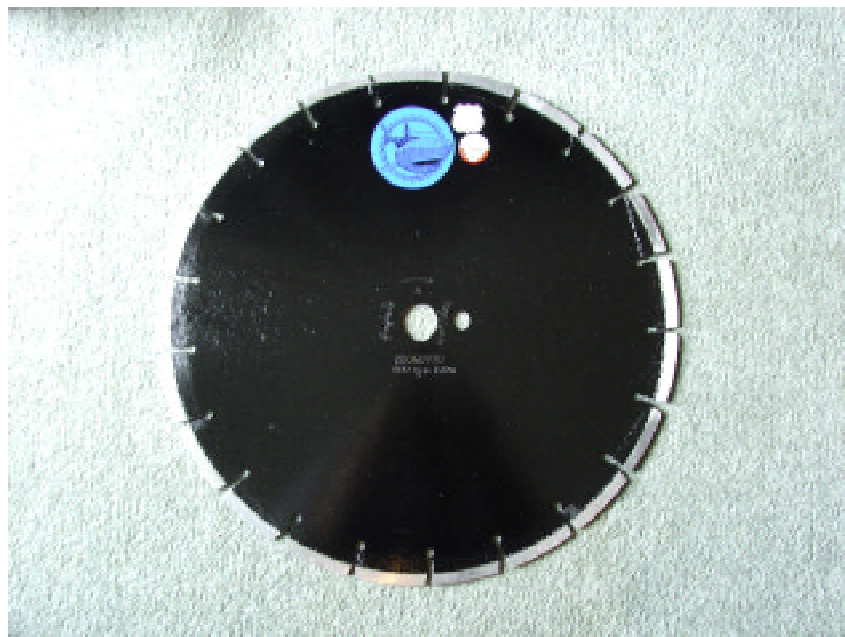

“Tiger Shark” is the result of many tests to establish a diamond and metal bond structure that would perform on power cut off saws, both hand held and trolley mounted.

The Infrastructure industry has many varied needs for its' variety of hand held power cut off saws. Cuts are made on asphalt hotmix and chipseal roads, footpaths, and driveways, even curbs.

“Tiger Shark”, a member of our very successful “Shark” family, has been designed to perform best on typical Infrastructure jobs with power cut off saws like Stihl, partner, Husqvarna etc. 90..120ccs ccs.

“Tiger Shark” is laser welded at white heat to ensure the segments stay put when the going gets rough. We use state of the art heat conducting technology and expensive raw materials to produce a blade you can trust when cutting typical asphalt and hotmix roads, footpaths driveways and kerbs.

The assemble standard is IS9001, core protection massive and life is at the top end. In short a premium professional blade.
